WELCOME ADDRESS

Dear Colleagues and friends,

Unprecedented growth of aquaculture has been recognized in recent decades both in inland and marine waters worldwide, which has generated significantly increased food production for humans. However, many challenges are also rising such as degraded environment, disease outbreaks, and especially impacts of climate changes that make the industry face many problems. More breakthroughs and innovations are therefore needed to mitigate these challenges.

With that context, the College of Aquaculture and Fisheries, Can Tho University, and the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH together host the 2024 International Conference on Aquaculture with the theme: ***A Panorama of Innovation in Aquaculture***. This conference aims to bring scientists, managers and enterprises from many countries around the world and Vietnam together to share research achievements, high-tech aquaculture technology processes, adaptation to climate change, as well as breakthrough ideas, innovation, and creativity to promote sustainable development of the aquaculture industry in the country and the region.

We do hope the new findings from different important fields including Broodstock and larviculture; Aquaculture engineering; Circular aquaculture; Fish nutrition and physiology; Fish health management; Genetic and selective breeding; Aquaculture environment management; Seafood processing and safety; and especially with the two new areas of Industry innovations sharing and Animal welfare will be openly highlighted and shared.

The conference is also a great opportunity for national and international scientists, managers, and enterprises to meet, exchange, and develop collaboration in scientific research, training, aquaculture production, and business.

We would like to express our deepest thanks to the sponsors, without your generous support, this conference would not have taken place successfully.

Our great gratitude is also to all the participants who are either scientists from academic institutions or managers, farmers, businesses from the private sectors, without your participation, this conference would not have occurred either.

The conference takes place on a beautiful island that has become a famous site for tourists worldwide. We do hope that all participants will enjoy the conference as well as the beauty and scenery of Phu Quoc.

Phu Quoc Island

Phu Quoc Island is one of the most attractive islands of Vietnam. It owns endless unspoiled beaches for water activities, romantic sunsets for Instagram feed, uninhabited remoted islands for exploration, and dense tropical forests for adventures. Beyond the snow-white beaches with ice cream-soft sand, Phu Quoc offers a wide range of luxury resorts, chic restaurants, and comforting spa treatments. Traditional villages, sacred temples and pagodas, and spacious green parks can also please even a perfectly picky traveler.

Sightseeing

Bãi Sao is one of the most stunning beaches in Phu Quoc, located in An Thoi town, approximately 28 km from Duong Dong town or around 10 km from the Conference Venue. This picturesque beach features crystal-clear blue waters and stretches over 7 km of fine white sand. Visitors can enjoy leisurely walks along the shoreline, listen to the soothing sounds of the waves at dawn, or take a refreshing swim in the sea while capturing beautiful photos. The calm waters and gentle waves also make Bai Sao an ideal spot for various water sports, especially kayaking. It's the perfect destination for both relaxation and adventure!

Hòn Thơm is one of the most popular tourist islands in Phu Quoc, offering beautiful beaches and a range of exciting activities such as coral diving, fishing, squid fishing, kayaking, and jet skiing. A highlight of the island is Aquatopia Water Park, which features 20 thrilling attractions for visitors to enjoy.

To reach Hòn Thơm, visitors start at the cable car station, designed in an ancient Roman style, making it a favorite photo spot for many. From there, you'll take the world's longest three-wire cable car, stretching 7,899 meters. The ride

offers breathtaking views of the clear blue sea and tranquil islands dotted with boats. Visitors can purchase tickets in advance or buy them at the entrance to the cable car station. The combined ticket for the cable car, water park access, and lunch buffet is priced at 600,000 VND.

Additionally, you can book an island tour that includes Hòn Thơm and other nearby islands. A popular option is the 4-island tour, which visits Hòn May Rut Trong, May Rut Ngoai, Gam Ghi, and Hòn Mong Tay in the An Thoi archipelago. Tourists are picked up from their hotels and taken to An Thoi port for a canoe ride, including snorkeling to see the coral at Hòn Gam Ghi. This tour package

includes underwater filming and photography and costs around 1,000,000 VND per person.

For those who may experience seasickness or prefer fewer activities, 2 or 3-island tours are also available. Enjoy your adventure on Hòn Thom!

The Phu Quoc Night Market is situated on Bach Dang Street, approximately 1 km from Dinh Cau. It operates from 5 PM to 11 PM on weekends, offering a vibrant atmosphere with numerous stalls featuring fresh seafood and local specialties like fish sauce, sim candy, pepper, and handicrafts.

In addition to sightseeing and shopping, be sure to indulge in the fresh seafood dishes prepared right at the market.
